Section 6 Spill or Leak Procedures

Steps to Take in Case Material Is Released or Spilled:

Exposure to the spilled material may be irritating or harmful. Follow personal protective equipment recommendations found in Section 8 of this SDS. Additional precautions may be necessary based on special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred. Also consider the expertise of employees in the area responding to the spill. Ventilate the contaminated area. Isolate area. Keep unnecessary personnel away.

Methods for Clean-up

Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section 8 at a minimum. Dike with suitable absorbent material like granulated clay. Gather and store in a sealed container pending a waste disposal evaluation. Do not allow the spilled product to enter public drainage system or open waterways. Gather and store in a sealed container pending a waste disposal evaluation. Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container Collect spillage.

Section 7 Handling and Storage

Handling:

Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Avoid release to the environment. Keep container tightly closed in a cool, well-ventilated place. Avoid contact with skin and eyes. After contact with skin, wash immediately with plenty of water. Harmful if swallowed.

Storage:

Store locked up. Suitable for any general chemical storage. Keep container tightly closed in a cool, well-ventilated place. Material is hygroscopic (absorbs moisture).

Storage Code:

Green - general chemical storage
